

The logo for Yo!Deals features an orange square with a white diagonal slash, followed by the text "Yo!Deals" in a bold, black, sans-serif font.

Yo!Deals

The title "USER MANUAL" is centered in a large, bold, black, sans-serif font. It is flanked by two orange trapezoidal shapes that point towards the center, creating a frame-like effect.

**USER
MANUAL**

The text "PREPARED BY : FATBIT TECHNOLOGIES" is centered. "PREPARED BY :" is in a smaller, black, sans-serif font, and "FATBIT TECHNOLOGIES" is in a larger, bold, black, sans-serif font. Two horizontal orange lines are positioned above and below the text, extending from the left and right edges of the page towards the center.

How to get Google Map Key?

Following are the steps to get a Google Map Key

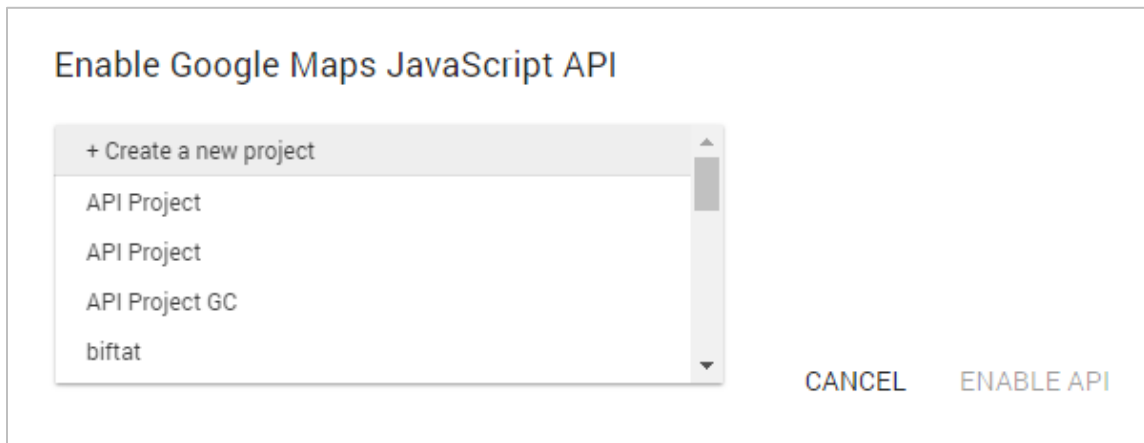

Step1: Open the following link:

<https://developers.google.com/maps/documentation/javascript/get-api-key>

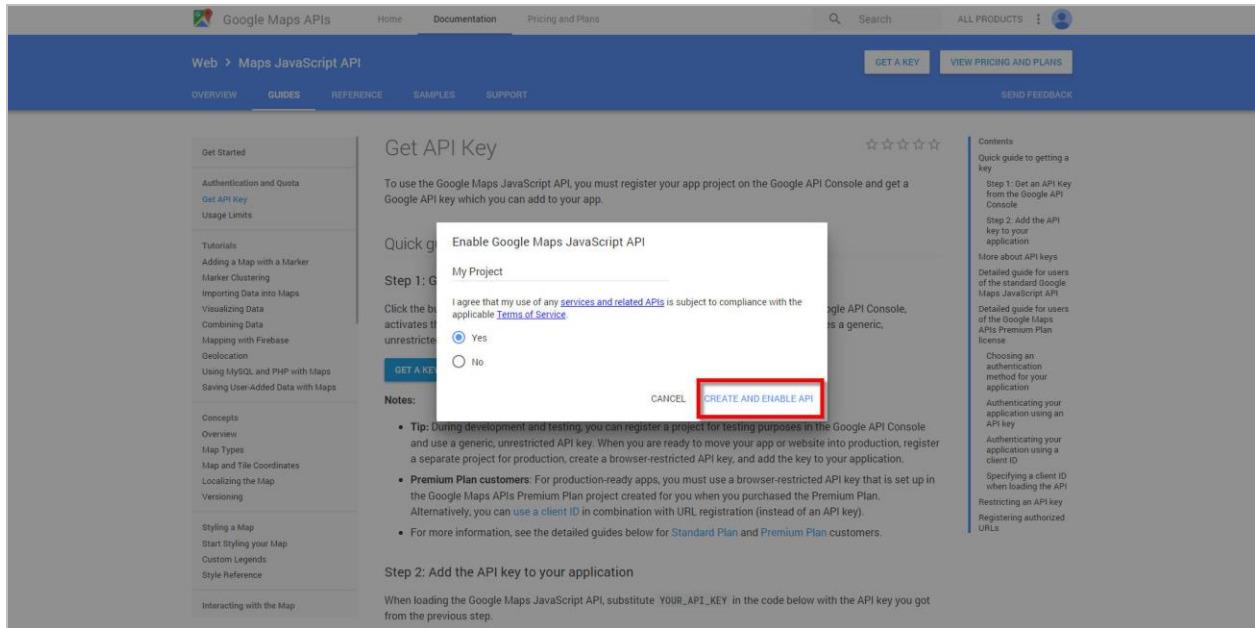

On this page, click on **GET A KEY** to generate a new Google Map key. Please see below screenshot for your reference:

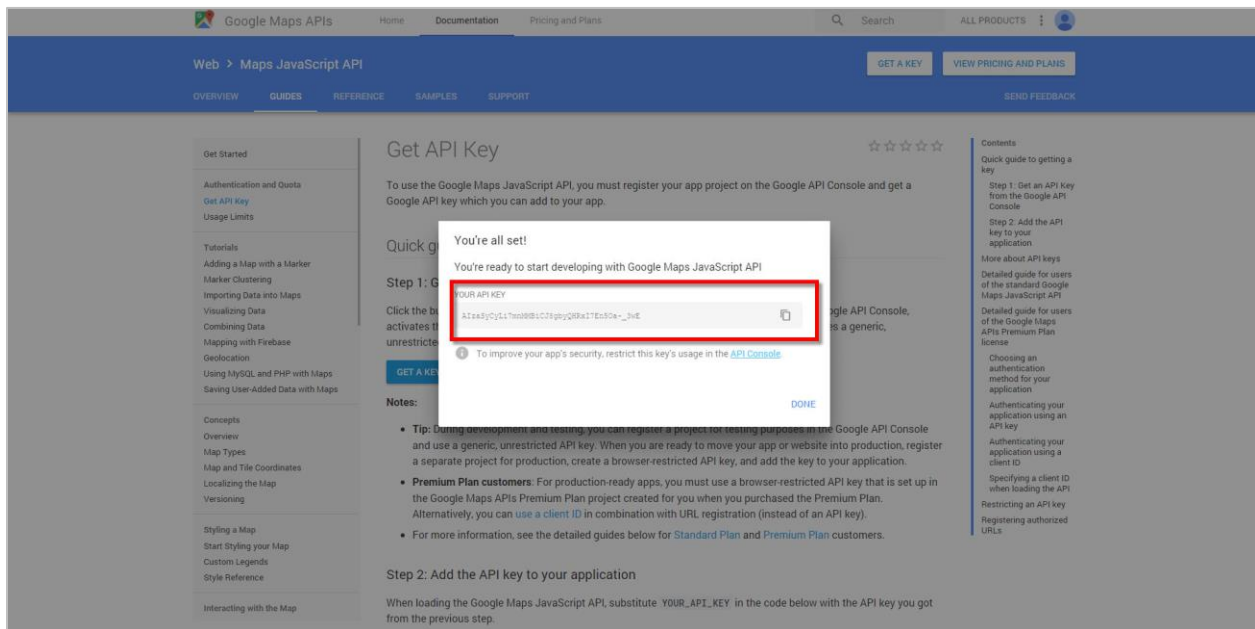

Step2: In the pop-up **Enable Google Maps API**, select **Create a new project** from the drop down and click on **Enable API**. Please see below screenshot for your reference:

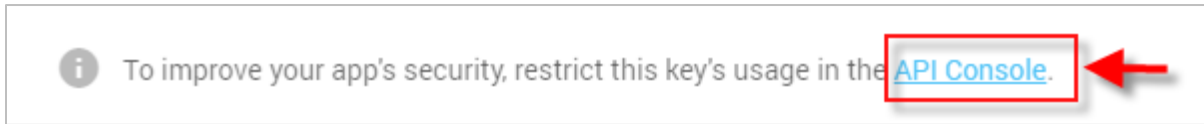

Step3: Enter the name of your project (For example: My Project) and click on **CREATE AND ENABLE API**. Please see below screenshot for your reference:

Step4: A Google Map key will be generated. You can copy the key from the pop-up and update the same in the Admin area. Please see below screenshot for your reference:

Step5: Click on API console below the key to add the domain name. Please see below screenshot for your reference:

Step6: On the API console screen, select **HTTP referrers** from the key restriction area and enter the domain name. Please see below screenshot for your reference:

This API key can be used in this project and with any API that supports it. To use this key in your application, pass it with the `key=API_KEY` parameter.

Name

API key

⚠ Key restriction
This key is unrestricted. To prevent unauthorized use and quota theft, restrict your key.
Key restriction lets you specify which web sites, IP addresses, or apps can use this key. [Learn more](#)

None
 HTTP referrers (web sites)
 IP addresses (web servers, cron jobs, etc.)
 Android apps
 iOS apps

Accept requests from these HTTP referrers (web sites) (Optional)
Use asterisks for wildcards. If you leave this blank, requests will be accepted from any referrer. Be sure to add referrers before using this key in production.

⚠ You have not set any referrers. Other applications might be able to use this key.

.example.com/

Note: It may take up to 5 minutes for settings to take effect

Save Cancel

Click on save to save the domain name and this key will be valid for specific only.

Note: To add a key on a separate domain, you have to create a separate project and create a Google Map Key for that domain only.
