Introduction

UMS (University Management System) is a comprehensive solution that will manage the whole university or institution's working, its student information and data.

It is important for education providers to impart personalized attention to students and at the same timework towards expanding the institution beyond existing boundaries.

This centralized automated system will contribute in making the education process more streamlined and easy to maintain so that quality of education can be improved.
System takes the responsibility of proper administration on its shoulders and helps the faculty and staff to concentrate on students’ development.

The university management system is well-integrated division wise as well as departmental wise. It is a web based automated system that works towards handling the daily activities.

In this system, all the modules are custom made along with processing payments both via bank deposit or web payment.
System Benefits/Advantages

- User friendly, browser based.
- Multi-level architecture.
- Standardized information flow and work flow.
- Data is properly managed and stored.
- Easily configurable/setup.
- User friendly reporting for administrator and its sub-admin users.
- Effective management of administrative and university management functions those are necessary to handle all of the challenges of running educational institutions.
- Real time information processing and maintenance of large volume of data including student, faculty, inventory, facility (hostel) management, library, staff details, and student fees among various departments in an institution.

Modules in University Management Module

- CMS Module.
- Admission/Registration Process Module.
- Login Protected Module for Student, Academic – Lecturer, Non-Academic - Staff & Administrator Areas.
- Online Assignments Module – By lecturer to students.
- Hostel/Accommodation Management Module.
- Personnel Module.
- Financial Management (Bursary) Module.
- Courses Management Module.
- Result computation Management Module.
• Transcripts Management Module
  • Student Grade sheet.

Library Management Module
  • Requesting issue of books.
  • E-library module and integration.
  • Serials (Optional).
  • Projects (Optional).
  • Journals (Optional).

• Promotion Management Module.

• Reporting Module
  • Registration report for students.
  • Results report.
  • Other Misc. reports like student performance report.

• Funding Bodies Module.
  • Funding Projects Management.
  • Sponsorship Funding Management (Optional).
  • Research Funding Management (Optional).

• Activity Codes Management.

• Audit Trail Log Management.

• Notification Module.

• Basic Misc. Features
  • Forums.
  • Chat system.
  • Polling system.
  • News/Events.
  • Voting system.
  • Alumni System.
Detailed Features:

- CMS Management
  - Informational content can be easily managed on a website based on UMS platform.
  - Managing navigational links on the website.
  - Managing the images/videos on the website.
  - Adding/Removing webpages on the website.
  - Meta information management under webpages.

- Online Admission/Registration
  - Various admission requirements are posted along with Eligibility criteria.
  - Students from different entry modes are available to register online.
  - Students do registration exercises based on their different entry modes in the system.
  - Each entry mode has specific steps through which student enters basic details, pay different type of fees, take printouts of receipts, forms etc.
  - *(Optional)* Provision for online verification of student results can be done from third party websites by spidering data.
